

ProVia Studio 2012 Updates

- New Tranquility decorative glass for entry doors and French doors.
- New Blossoms and Haven Inspirations series.
 - To select either of these series for entry doors, French doors and swinging patio doors select Inspirations Art Glass on the Glass page. A new page control has been added that lets you select between the pages of Inspirations series that are available. Simply click the Page 1 or Page 2 checkboxes to switch between the pages. Blossoms and Haven are on page 2.

SERIES: PAGE 1 PAGE 2

- To select Blossoms or Haven for storm doors, select either Inspirations Spectrum or Inspirations Decorator on the Style page. For Decorator, the new series were added with the existing Inspirations series. For Spectrum, there is a page control like the entry doors, except the 298 and 291 models are divided between the pages.

298 291

- For sliding patio doors, select Inspirations Art Glass on the Glass page. Like entry doors, a new page control has been added that lets you select between the pages of Inspirations series that are available. Simply click the Page 1 or Page 2 checkboxes to switch between the pages. Blossoms and Haven are on page 2.

SERIES PAGE 1 PAGE 2

- Simulated Divided Lite grids have been added for Signet Fiberglass. To select SDL grids, choose a Signet style that can have SDLs (see price book for availability). On the Glass page select the Clear & Grids option and then one of the grid styles. The SDL option can then be selected with the other grid types. The SDL colors will match the door color.

Grid Options

- The DOOR HANDLE section of the Options page has been reorganized to group the hardware into three categories—Locksets, Grip Entrance and Multi-Point. Checkboxes within the section determine which group is displayed.

LOCKSETS GRIP ENTRANCE MULTI-POINT

- Hardware prep and deadbolt prep options have been added to the Entry Door Options screen. If one of the hardware prep options is selected, the Lockset, Grip Entrance and Multi-Point selections on the Options page will be removed. Deselecting the hardware prep option will restore these hardware selections on the Options page. Likewise, checking the Deadbolt Prep Only option will remove the deadbolt hardware from the Options page. Unchecking the option will restore the deadbolt selections on the Options page.

Hardware Prep
 Prep For: Deadbolt Prep Only

- The Accent/Addison lockset has been added to the Locksets hardware grouping on the Options page.
- The Windsor and Townsend storm door handles are now available in the Antique Brass finish.

- The 410 door style can now be selected in for 20-Gauge Smooth and Textured Steel and for Heritage Fiberglass.
- Sunburst grids are now rendered for the 516 and 532 half-round transoms.
- The 002C-437 and 002CP-437 styles have been combined into a single style image for Smooth Steel on the Style page and the 002C-449 and 002CP-449 styles have been combined into a single style image for Signet Cherry on the Style page. For both of these styles, the Panel Style selector will appear when the style is selected to allow you to set the panel style.

- A custom width range can now be specified for the 770 Direct-Set sidelites in the Entry Door Options page.
- ComforTech™ glazing options are now available for all door styles that allow the glazing system to be upgraded.

ProVia Studio Tips

From any of the main Studio screens, there are two shortcut keys that can be used to access the ProVia Studio – Sell Pricing window that contains the door options and pricing. The F7 key will open the window with the door options as the active tab. The F8 key will open the window with the sell pricing as the active tab.
